Summary

Full Stack Developer and Product Engineer with experience designing and shipping AI-powered SaaS platforms, business intelligence systems, and scalable web applications using React, Next.js, TypeScript, and Node.js.

Technical Skills

- **Programming Languages:** JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3, SQL
- **Frontend:** React.js, Next.js, React Native, Flutter, Tailwind CSS, Bootstrap, Expo
- **Backend:** Node.js, Express.js, RESTful APIs, Microservices, WooCommerce REST API, JWT Authentication, Swagger/OpenAPI
- **Databases & Caching:** MongoDB, PostgreSQL, Supabase, MySQL, Redis Caching, Caching Strategies, SQLite
- **Core Engineering:** Product Engineering, Software Architecture, System Design, Microservices, SaaS, Business Intelligence
- **Cloud & DevOps:** Vercel, Docker, Linux, CI/CD, GitHub Actions, Domain & DNS Management, Web Hosting
- **AI & LLMs:** AI Agents, LLM (Groq/Llama), Prompt Engineering, AI Chatbot Development, AI Workflow Automation
- **Testing & Security:** Unit Testing, API Security, Responsible Disclosure, HMAC Authentication, Passkeys/WebAuthn, OAuth 2.0
- **Tools:** Git, GitHub, VS Code, Firebase, Figma, Postman, WordPress, Shopify

Experience

Founder & Lead Product Engineer

2024 – Present

Setups Works | SaaS & AI Product Development Studio

- Founded and currently lead Setups Works, delivering custom SaaS platforms, AI-powered applications, and enterprise software solutions for multiple client projects across diverse domains.
- Designed and developed 5+ production-ready web and mobile applications using Next.js, React, Node.js, Flutter, and TypeScript.
- Designed scalable architectures integrating WooCommerce REST APIs, Redis caching, AI agents, and self-hosted messaging infrastructure.
- Worked directly with clients from requirement gathering through architecture, development, deployment, and post-launch production support.

Projects

PulseCommerce – AI Commerce Intelligence Platform

github.com/nitheeshdr/PulseCommerce

- Designed and developed PulseCommerce, an AI-powered Commerce Intelligence Platform for WooCommerce featuring 13+ analytics modules, including RFM segmentation, customer lifetime value, churn prediction, inventory intelligence, and revenue forecasting.
- Built an AI Commerce Agent using Groq LLM that transforms natural language business requests into automated customer segmentation and workflows by integrating WooCommerce REST APIs, Webhooks, and event-driven data synchronization with self-hosted WhatsApp automation.

CodeForge AI – AI-Powered Coding Interview Prep Platform

GitHub | codeforgeai.io

- Designed a scalable coding interview preparation platform serving 33+ database tables, live multi-language execution environments, contest infrastructure, and subscription-based learning.
- Integrated a real-time streaming AI Mentor via Groq (Llama 3) with SSE, Passkey/OAuth authentication, Razorpay subscriptions, gamification (XP, badges, streaks), personalized roadmaps, discussion forums, admin dashboard, and Swagger API documentation.

Community Finance – Multi-Tenant Finance Management Platform

github.com/nitheeshdr/Community-Finance

- Built a multi-tenant SaaS finance platform supporting 3 event funding modes, Razorpay AutoPay subscriptions, and shared Zod schemas for type-safe contracts across Next.js 15 web (admin + REST API) and Expo SDK 54 mobile applications.
- Implemented role-based access control, real-time notifications, financial reporting dashboards, and secure multi-tenant data isolation for community administrators.

AI Expense Tracker – Privacy-First AI Finance Mobile App

github.com/nitheeshdr/AI-Expense-Tracker-App

- Engineered a privacy-first mobile finance app using Flutter 3, Riverpod, and SQLite with on-device SMS parsing for bank and UPI alerts, offline-first architecture, and Google Play Store deployment.
- Integrated AI-powered spending insights, subscription detection, budget recommendations, and interactive financial dashboards while maintaining a privacy-first, offline-first architecture.

Security Research

- Conducted a security assessment of StartupTN (Government of Tamil Nadu), responsibly disclosing web application security issues using OWASP methodologies.
- Prepared a comprehensive technical report with proof-of-concept findings and recommended mitigations for the responsible team.

Achievements

- Published multiple Android applications on Google Play Store.
- Contributed to open-source software with merged pull requests in Echo Music and Komi Store projects on GitHub.
- Successfully engineered and deployed 5+ production software platforms across web and mobile.

Education

B.Tech Computer Science Engineering (AI & ML)

2022 – 2026

Vels Institute of Science, Technology & Advanced Studies, Chennai
